EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative, David Brown on March 14, 2007.

The application has been amended as follows:

Replace page 17 of the Specification to read as follows:

the first interface establishing means, i.e. the gateway for the transmitting network such as an IP-based network, is eliminated. Hence, a simplified hardware structure can be achieved and disturbances of the use signal, i.e., the speech signal, by the control signal, i.e., the DTMF tone signal, can be reduced.

According to the above described embodiments, the speech channel can be kept open between gateways, so that the speech stream (TFO stream) if used can go through the first gateway 20 without disruptions even when DTMF tones are present.

According to the above embodiments, the first communication means 1 has been described as a mobile phone, in which the speech signal and the signaling message are generated separately. However, also a fixed phone can be used for this communication means 1, in case that in this fixed phone sends DTMF tones as signaling as in case of a mobile phone. Furthermore, the second communication means has been described as a mobile phone or a fixed phone. However, it is obvious that other kinds of communication

means can be used, for example, facsimile apparatuses or telephone answering apparatuses.

Moreover, the transmitting network 4 was described as an IP network. However, it should be understood that also another network over which the communication is effected can be used.

The above description and accompanying drawings only illustrate the present invention by way of example. Thus, the embodiments of the invention may vary within the scope of the attached claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Van Kim T. Nguyen whose telephone number is 571-272-3073. The examiner can normally be reached on 8:00 AM - 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bunjob Jaroenchonwanit can be reached on 571-272-3939. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
